(approval pending)

The Environmental Law Section of the California State Bar has joined with the
Agribusiness Committee to co-sponsor the 10th Annual Water Tour.

It is recommended that you leave laptop computers, briefcases and other electronics at home. You will be subject to security screening much like at an airport. The less additional items our participants carry, the quicker we can all pass through security.

⁴ Because of the security levels to enter government buildings and the delta pumping stations, we must provide the name, address, date of birth and Driver's License Number of each participant in advance of the meeting. You may call Chris Passarelli at the number above with this information, or send him a fax with a copy of your Driver's License if you prefer.
